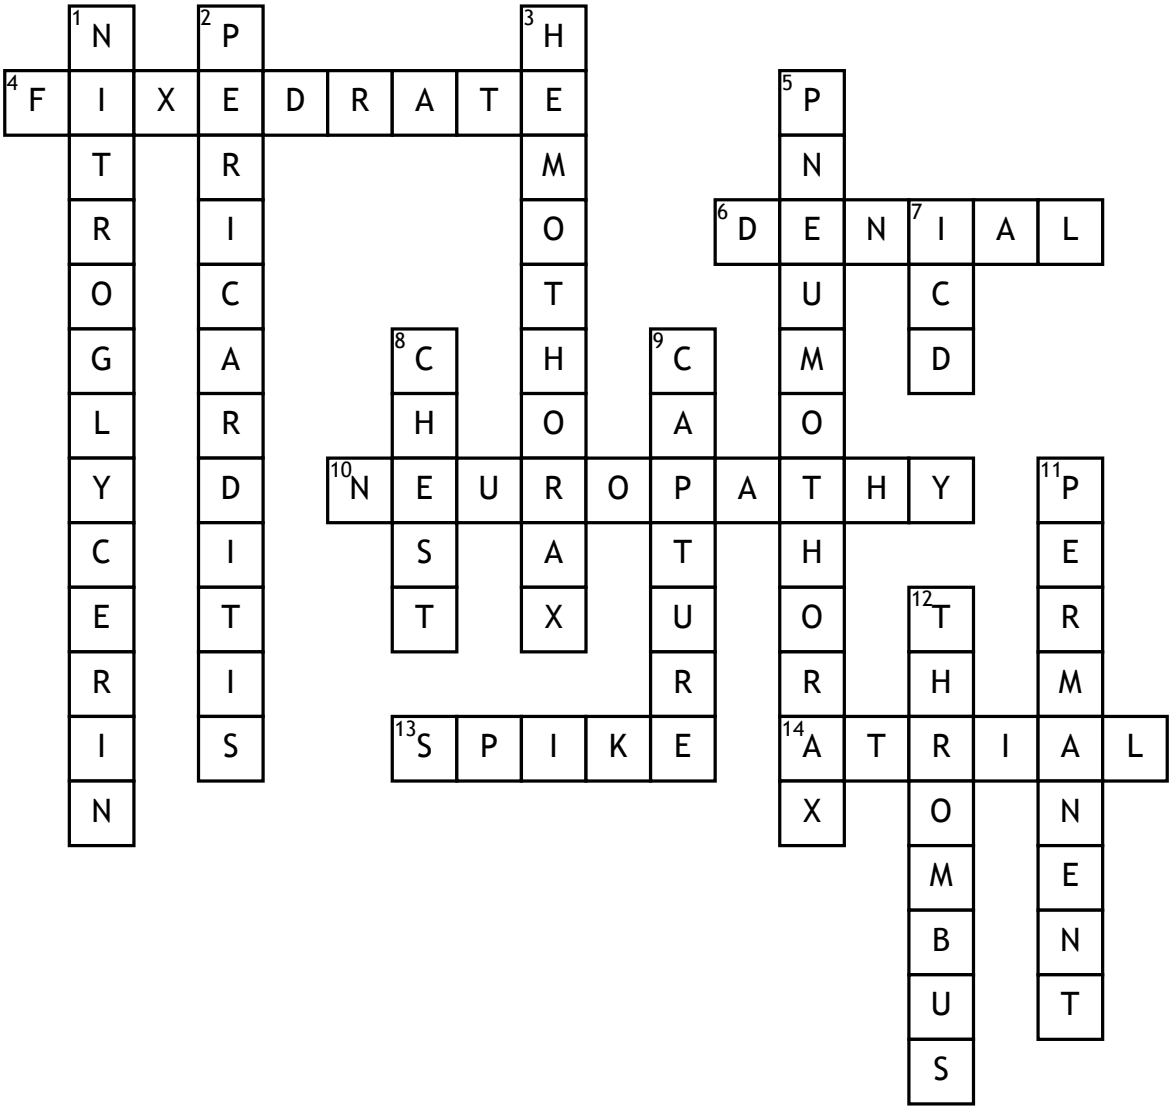
Name: _____ Date: _____

CHAPTERS 12/13 EKG STUDY CROSSWORD



Across

4. Programmed to deliver electrical impulses at a consent selected rate

6. A common obstacle to the timely intervention by a health care provider when a patient complains of chest pain is

10. Inability to perceive pain due to diseases to the nerves

13. The EKG wave produced by an artificial pacemaker is called a pacemaker what

14. What pacemaker is also known as a single-chamber pacemaker and electrical impulse first stimulates the atrium and then travels down through the ventricles

Down

1. Causes dilation of the blood vessels that consequently reduces the workload of the heart

2. Inflammation of the pericardial sac

3. Collection of the blood within the pleural cavity

5. The collection of air within the pleural cavity

7. What was designed to directly treat a cardiac tachydysrhymia

8. What kind of paints most common in presenting symptoms of cardiac disease

9. Is indicated on an EKG strip when there is a P wave or QRS complex following each pacemaker spike

11. Pacemaker implanted in the upper left chest

12. The most common cause of myocardial infraction is ___ formation that blocks a coronary artery
