Psychology: Chapter 1

Across

the next

- **3.** The scientific study of human functioning with the goals of discovering and promoting strengths and virtues that help individuals and communities to thrive
- **8.** An explanation using an integrated set of principles that organizes observations and predicts behaviors/events
- **13.** Repeating the essence of a research study, usually with different participants in different situations
- **14.** An integrated approach that incorporates different but complementary views from biological, psychological, and sociocultural perspectives
- **16.** Theory that provides an account of how a thought can arise in two different ways **17.** The ideas and behaviors shared by a group and passed on from one generation to

- 19. Anything a human or non human animal does (any action we can observe and record)20. A measure of the extent to which two
- factors vary together

Down

- **1.** An observation technique in which one person is studied in depth in the hope of revealing universal principles
- 2. Thinking that does not blindly accept arguments and conclusions. Rather it examples assumptions, uncovers hidden values, weighs evidence, and assesses conclusions
- **4.** Observing and recording behavior in naturally occurring situations without trying to manipulate/control the situation
- **5.** A statement of the procedures used to define research variables

- **6.** A procedure in which participants and research staff are blinded about who has received the treatment (or the placebo)
- 7. Predictions that let us test the theory
- **9.** Judging contributions of biology and experience
- 10. The tendency to believe, after learning an outcome, that one would have foreseen it
- 11. The scientific study of behavior and mental processes
- **12.** Emphasized the growth potential of healthy people and the individual's potential of for personal growth
- **15.** A sample that fairly represents a population because each member has an equal chance of inclusion
- **18.** A technique for ascertaining the self reported attitudes or behaviors of people
