

# Weathering, Erosion and Deposition

## Across

2. materials carried by a stream
3. term for all materials carried and deposited by a glacier
7. a place where land and a body of water meet
8. thick deposits of windblown, fine-grained sediment
9. mounds of wind deposited sand
12. fan shaped pattern where streams deposit their loads
13. process by which eroded material is dropped
14. the process by which sediment and other materials are moved from one place to another

## Down

1. large mass of moving ice that forms by the compacting of snow by natural forces
4. flat area formed by layers of deposited sediment
5. a fan shaped deposit that forms on dry land
6. water located within the rocks below Earth's surface
10. sudden and rapid movement of a large amount of material downslope
11. an area of shoreline that is made up of material deposited by waves and currents
