

History of Theatre

Across

- 2.** a platform that could be rolled out, modernly called wagon
4. the portion of the stage that is further away from the audience
6. the seating area, in the beginning of the amphitheater
11. Greek god of wine and fertility
12. the portion of the stage which extends in front of the act curtain
15. an imaginary line that runs through the middle of the proscenium arch
16. the chorus would chant this while sacrificing a goat

- 17.** a developed raised platform in front of the skene
18. this was behind the orchestra and provided a background for the performance
19. any length of pipe or lumber supported from the lines of a fly system
20. portion of the stage that is towards the audience

Down

- 1.** a term used to refer to actors
3. a more developed roman structure, developed from it's Greek predecessor

- 5.** a series of triangular prisms, each face painted with a new scene
7. usually a criminal trained to fight for his freedom
8. a curtain used to mask the area above the stage from the audience
9. Caesar at the time Jesus was born, reluctantly "allowed" Christianity
10. the chorus performed in this space
13. a skydrop
14. a crane like device places behind the skene
