# angle pairs

## Across

2. angles that share a side

7. a ray that divides an angle into two congruent angles

10. a flat surface that extends in all directions without end

11. the part of a line consisting of one endpoint and all the points of a line on one side of the endpoint

13. angle that is greater than 90 degrees

14. points that lie on the same line

15. angle that adds up to 90 degrees

16. an angle that measures 180

17. two rays that have the same endpoint

18. angles that are across from each other

## Down

1. a part of a line with two endpoints

3. angles that add up to 180

4. a series of points that extend in two opposite directions without end

5. points that lie on the same plane

6. angles that have the same measure

8. an angle that measures 90 degrees

9. divides a segment into two congruent segments

12. an angle that is less than 90 degrees
