Across

- 1. water in its gas form
- 8. the weight of air on Earth's surface
- 9. correct
- 10. water that falls from clouds onto the Earth's surface in the form of rain, snow, sleet or hail

Down

2. the change of state from liquid to gas

- **3.** a measure of how hot or cold something is
- **4.** continuous movement of water from water sources into the air and ground, onto and over land, and back to the water source
- **5.** when water vapor cools and changes back into a liquid
- **6.** a collection of millions of tiny water droplets or ice crystals
- 7. water vapor condensing on gass, and forming small water droplets
