Across
1. Cell type that produces estrogens and surrounds developing egg
2. Male sex hormone
3. Structure on ovarian surface that produces estrogen and progesterone after ovulation
4. Hormone that is elevated after ovulation
5. Accessory sex gland that produces fluid to neutralize urine residue in the urethra
6. Accessory sex gland that produces majority of seminal fluid
7. Site of sperm development
8. Accessory sex gland that surrounds the male urethra
9. Tube that transports sperm from testes to urethra
10. Hormone that is elevated after ovulation
11. Accessory sex gland that produces major component of seminal fluid
12. Rigid structure that protects the uterus from infection
13. Accessory sex gland that surrounds the male urethra
14. Tube for urination and ejaculation (in males)
15. Muscular organ for fetal development
16. Tube for urination and ejaculation (in males)
17. Male gonad (singular)
18. Cell type that produces testosterone
19. Cell type that produces androgens in females
20. Inner lining of uterus that sheds during each menstrual cycle
21. Female gonad (singular)
22. Tube that transports sperm from testes to urethra
23. Muscular layer of uterus that contracts to expel fetus
24. Male external genitalia for copulation
25. Birth canal or copulatory structure
26. Female gamete
27. Cell type that produces androgens in females
28. Structure that contains developing egg
29. Stores urine
30. Hormone that triggers the development of both sperm and eggs
31. Site of sperm maturation
32. Cell type that supports developing sperm
33. Single-cell embryo

Down
1. Cell type that produces estrogen and surrounds developing egg
2. Male sex hormone
3. Structure on ovarian surface that produces estrogen and progesterone after ovulation
4. Hormone that signals egg to develop
5. Hormone that triggers ovulation
6. Male gamete
7. Tube that transports egg from ovary to uterus; also the site of fertilization
8. Tube that transports egg from ovary to uterus; also the site of fertilization
9. Tube that transports egg from ovary to uterus; also the site of fertilization
10. Site of sperm development
11. Accessory sex gland that produces fluid to neutralize urine residue in the urethra
12. Accessory sex gland that produces majority of seminal fluid
13. Accessory sex gland that surrounds the male urethra
14. Tube for urination and ejaculation (in males)
15. Muscular organ for fetal development
16. Tube for urination and ejaculation (in males)
17. Male gonad (singular)
18. Accessory sex gland that produces fluid to neutralize urine residue in the urethra
19. Accessory sex gland that produces fluid to neutralize urine residue in the urethra
20. Inner lining of uterus that sheds during each menstrual cycle
21. Female gonad (singular)
22. Tube that transports sperm from testes to urethra
23. Muscular layer of uterus that contracts to expel fetus
24. Male external genitalia for copulation
25. Birth canal or copulatory structure
26. Female gamete
27. Cell type that produces androgens in females
28. Structure that contains developing egg
29. Stores urine
30. Hormone that triggers the development of both sperm and eggs
31. Site of sperm maturation
32. Cell type that supports developing sperm
33. Single-cell embryo

Chapter 19 - Reproductive System
