Crustaceans

Across

3. six pairs of appenedages, carapace, book gills, and spiked tail

4. shrimplike, flattened sides

5. carbohydrate that makes up the exoskeleton of arthopods

7. flattened bodies, seven pairs of legs

9. part of exoskeleton that coves head and chest regions

12. jointed appendages, exoskeleton, bilateral symmetry

14. cold-water, shrimplike, planktonic crustacean

15. overlapping membranes used for breathing and locomotion

16. shedding outer covering each year

17. overlapping calcium carbonate plates and cirri

Down

1. base of ocean food chain

2. bilateral symmetry, exoskeleton, and two main body segments

6. comprises head and chest region

8. small paddlelike appendages under the abdomen

10. feathery appendages that catch food partacles

11. tough body covering of chitin

13. long spiked tail used for locomotion
