

Audio Video

Across

- 2.** the action of the air molecules moving closer together permitting audible sound
- 5.** the science of sound wave behavior in air.
- 9.** the best resolution
- 12.** the ratio of image width to image height
- 16.** audio engineering society
- 17.** central processing unit
- 18.** most commonly used component in a loudspeaker system and found in all ranges of drivers.
- 19.** plays a collection of pictures fast
- 20.** a method of transmitting information by a continuous but varying signal.

Down

- 1.** an acronym for coder/decoder. An electronic device that converts analog signals, such as video and audio signals, into digital form and compresses them to conserve bandwidth on a transmission path.
- 3.** an illustration of the signal path through a given system.
- 4.** an electric current that reverses its direction periodically.
- 6.** a grouping or range of frequencies
- 7.** video signal that has not been modulated
- 8.** The part that shows film
- 10.** closed circuit television
- 11.** shortened form of binary digit, symbolized by 1s and 0s. The smallest unit of digital information.
- 13.** sound
- 14.** Frames per second
- 15.** a comparison of two measurements or values. Abbreviated dB, it is one-tenth of a Bel (a unit of measurement named for Alexander Graham Bell).
