Disorders of the Endocrine System

1. Hypoparathyroidism
2. Hypothyroidism
3. Pituitary Dwarfism
4. Hyperparathyroidism
5. Cushing’s Disease
6. Diabetes Mellitus
7. Adrenal Insufficiency
8. Acromegaly
9. Hyperkalemia
10. Hyperaldosteronism
11. Hypercortisolemia
12. Hypothyroidism
13. Hyperthyroidism
14. Hypercalcemia
15. Hypergonadism
16. Hyperinsulinemia
17. Hyperprolactinemia
18. Hyperpro description
19. Hypertrichosis

Across
1. is a disorder in which the adrenal gland releases too much of the hormone aldosterone into the blood.
2. abnormally large stature, relatively normal body proportions.
3. Pituitary Dwarfism.
4. deficiency of glucose in the bloodstream.
5. Cushing's Disease
6. swelling related to mucoid build up is the most severe form of hypothyroidism.
7. premature sexual development
8. depression associated with late autumn and winter and thought to be caused by a lack of light.
