## MEDICAL TERMINOLOGY - CHAPTER 12 MATCHING

- |   |                          |
|---|--------------------------|
| 1. The function of this organ is to filter the blood with water and nutrients J     | A. hyperkalemia          |
| 2. Specialists that deal with both the urinary tract and male reproductive system R | B. vasectomy             |
| 3. small cluster of blood vessels in the kidney M                                   | C. cystoscope            |
| 4. funnels urine from the kidneys and onto the bladder G                            | D. nephrosis             |
| 5. known as little rocks Q  | E. cystoscopy            |
| 6. positioned in front of the urinary bladder H                                     | F. renal angiogram       |
| 7. low urine output N   | G. ureters               |
| 8. painful urination T  | H. prostate              |
| 9. high potassium in the blood A  | I. nephrotosis           |
| 10. most common types of images of the urinary tract K                              | J. kidneys               |
| 11. special camera inserted into the bladder C                                      | K. intravenous pyelogram |
| 12. kidney condition D  | L. renal ischemia        |
| 13. process for examining the bladder E   | M. glomerulus            |
| 14. image of a kidney blood vessel F  | N. oliguria              |
| 15. imaging using high-frequency sound waves P                                      | O. diuresis              |
| 16. excessive urination O   | P. ultrasonography       |
| 17. study of the kidneys S  | Q. kidney stones         |
| 18. downward displacement of a kidney I   | R. urologists            |
| 19. deficiency of blood in a kidney L   | S. nephrology            |
| 20. surgical removal of the vas deferens B  | T. urodynia              |
