

Name: _____ Date: _____ Period: _____

Algebra 2 Vocabulary Words

Across

2. The sum of a number of terms (4 or more)
 4. What the graph is doing ,or the end of a graph
 7. one of form $f(x) = ax^2 + bx + c$, or equal to zero
 8. sets of numbers highest minus lower number
 10. The point where the line crosses the vertical
 13. one of the 90 in the right angle
 14. When plugged in for the variable, makes the function equal to zero

15. A statement that the values of two mathematical expressions that are equal

16. Something that matters
 17. A formula used for quadratic equations (plug in)
 19. Breaking up a polynomial into simple terms (the factors)
 20. The product of a constant and two linear term

Down

1. Between 2 numbers is the largest factor that they have in common
 3. x value of a function

5. A function with only one independent variable in a straight line
 6. An expression in algebra that contains 3 terms in an equation
 9. The largest number that can be divided to the same number evenly
 11. when the number of terms is two in an equation
 12. Properly multiplying, or an expression that identifies factors to be multiplied
 18. no quality or numbers
