# Social Structure

## Across

3. Condition in which the roles of a single status are inconsistent or conflicting.
5. people's actual role behavior-does not always match the behavior expected by society
8. corresponding roles that define the patterns of interaction between related statuses
9. A position that strongly affects most other aspects of a person's life.
10. Condition in which the performance of a role in one status interferes with the performance of a role in another status.

11. The patterned interaction of people in social relationships.

## Down

1. socially determined behaviors expected of a person performing a role
2. A position that is neither earned nor chosen but assigned.
4. The process of learning to participate in a group.
6. a socially defined position in a group or in a society
7. the behavior-the rights and obligations-expected of someone occupying a particular status
