## Force, Motion, and Newton's Laws Crossword Puzzle

## <u>Across</u>

**3.** The rate at which velocity changes over time.

6. An object at rest stays at rest, and an object that is in motion stays in motion.

9. A push or pull.

**11.** The speed of an object is rarely constant.

**13.** A force of attraction between objects due to their mass.

**16.** A standard unit of measurement.

**17.** The speed isn't increasing nor decreasing.

**18.** Between bodies separated by distance.

19. A unit to express force.20. The acceleration of an object depends on the mass of the object and the amount of force applied.

## <u>Down</u>

**1.** An increase in velocity.

**2.** A decrease velocity.

**4.** A metric unit of measurement to measure LONG distances.

**5.** A force exerted during contact between objects.

7. The speed of an object in a particular direction.

**8.** The tendency of all objects to resist a change in motion, so an object will not move until a force makes it move.

10. Whenever one object exerts a force on a second object, the second object exerts an equal and opposite force on the first object.
12. A change in position over time.

**14.** A quantity that has both size and direction.

**15.** The weight of an object, or how much matter is in the object.
