

Name: _____

Date: _____

Organization of Life

Across

3. Entire organism made up of one cell.
 7. Two different parent organisms contribute genetic information.
 8. Means the age of hell.
 9. Depicts evolutionary relationships among groups.
 13. Simplest cell that does not have a nucleus and membrane bound organelles.
 15. The breaking down of complex substances.

16. Change in a population over time.
 17. Growth of a plant in response to the force of gravity.
 18. Bending of a plant when touched.
 19. How the plant moves in response to the light stimulus.
 20. More complex cells that have a nucleus and membrane-bound organelles.

Down

1. Two word naming system.
 2. Living organism made up of many cells.

4. A single parent organism reproducing identical offspring by itself.
 5. Study of the classification of organisms.
 6. The study of all living things.
 10. Family tree showing evolutionary relationships.
 11. Study of evolutionary relationships.
 12. Smallest unit capable of all life functions.
 14. The building up of complex substances.
