# solubility

## Across

2. substance that dissolves  
 5. substance that does the dissolving  
 6. the solid that comes out of a solution  
 9. a mixture of substances where one is dissolved into the other

11. the concentration of a saturated solution

12. when particles of a solute interact with and are completely surrounded by particles of a solvent

## Down

1. the mass of solute dissolved per unit volume of solvent

3. describes a solution that will hold no more solute

4. containing a large amount of of solute compared to a solvent

7. does NOT have ability to dissolve

8. has ability to dissolve

10. containing a small amount of solute compared to a solvent

## Word Bank

dissolve	solvent	soluble	concentration
concentrated	solute	precipitate	saturated
insoluble	dilute	solution	solubility
