

Name: _____ Date: _____ Period: _____

solubility

Across

2. substance that dissolves
5. substance that does the dissolving
6. the solid that comes out of a solution
9. a mixture of substances where one is dissolved into the other

11. the concentration of a saturated solution

12. when particles of a solute interact with and are completely surrounded by particles of a solvent

Down

1. the mass of solute dissolved per unit volume of solvent

3. describes a solution that will hold no more solute

4. containing a large amount of of solute compared to a solvent

7. does NOT have ability to dissolve

8. has ability to dissolve

10. containing a small amount of solute compared to a solvent

Word Bank

saturated
