$\qquad$

## Matrices and determinants

## Across

3. $\mathrm{lAl}=0$ and adjA.B not equal to zero
4. $A=A^{\prime}$
5. Diagonal matrix having same elements in principle diagonal
6. Elements present above the principle diagonal are zeroes in a square matrix
7. Condition for matrices add and subtraction
8. Determinant of A equal to zero Down
9. $A=-A^{\prime}$
10. Elements present below the principle diagonal are zeros in a square matrix
11. Matrix contains equal number of rows and columns
12. Value of determinant having identical rows
