

Name: \_\_\_\_\_

Date: \_\_\_\_\_

# Animal Tissue

## Across

4. Connective tissue that binds muscles to bones

11. Connective tissue that forms a continuous layer under the skin

13. Secretory cells found in some epithelia

18. Muscle tissue that moves at will is \_\_\_\_\_

19. Tissue that is involved in blood clotting

20. Muscle tissue that allows the movement of bones

## Down

1. Connective tissue that stores energy in the form of Fat

2. This type of Epithelium is responsible for absorption of digested substances, support other cell types

3. Provides support for the nose ears and joints

5. Connective tissue involved in the bodies immune response

6. Connective tissue that is found at joints, joining bone to bone

7. \_\_\_\_\_ fibre is found in connective tissue, allows the issue to be strong and flexible

8. Epithelium that has a large surface area, is permeable and protects the underlying tissue from damage

9. Red Pigment that binds with oxygen, aids in transport of oxygen

10. Connective tissue that transports Gases to and from cells

12. Type of neurons that bring about movement of an effector muscle

14. \_\_\_\_\_ columnar epithelium has hair like structures.

15. Muscle tissue that is involuntary, slightly striated and lines the walls of the heart

16. Connective tissue that protects internal organs, supports the body and is attached to muscles.

17. Tissue that carries electrical impulses from one part of the body to another
