# Chapter-2 Is Matter Around Us Pure?

## Across

5. different atoms combined in definite proportion

7. separation of miscible liquids

9. has dispersed phase and dispersed medium

10. separation of cream from milk

11. substance left on filter paper after filtration

13. liquid obtained after filtration

14. clear and stable mixture

## Down

1. having same kind of atoms

2. immiscible liquids are separated using

3. phenomena of scattering of light by

4. separating components of dyes

6. uniformly spread

8. mixture in which particles can be seen by naked eyes.

12. components mixed in any proportion
