

Economics Supply and Demand

Across

- 4. innovation in computers - supply determinant
- 8. customers buy more of these goods when their income decreases
- 10. the amount a customer is willing to pay for a good
- 12. determinant that increases demand when it increases
- 13. customers become concerned about the production effects of a product on the
- 14. a firm stops paying overtime leading to lowered
- 15. mathematical relationship between price and quantity demanded
- 16. this occurs when firms leave the industry
- 17. should interest rates on credit cards increase, demand for holidays
- 19. this occurs as a result of improved productivity
- 20. quantity a producer is willing and able to produce at a given price in a given period

Down

- 1. type of good when increase in price of one good (A) causes demand for another good (B) to increase
- 2. a move along a demand curve to the left
- 3. price achieved in market increases (from producer's point of view)
- 5. tastes shift towards the good concerned
- 6. coffee with cream is example of these goods
- 7. the amount a person is willing and able to pay for a good
- 9. determinant of supply
- 11. government imposes an which is then used to educate people about the dangers of the good
- 18. given by government to encourage more production of a good and lower price
