

# Camera Shots and Angles

## Across

**5.** A shot that is close enough to just show someone's face

**8.** A shot at the beginning of a film to set a scene

**9.** A shot which shows a person from the waist up

**10.** when two shots dissolve into each other it is called a \_\_\_\_\_ transition

**11.** A shot which is big enough to show the whole scene and landscape

**12.** A shot which shows a person from the chest up

## Down

**1.** When the camera films what is happening over the shoulder of a character

**2.** When a film cuts across two different scenes it is called ...

**3.** Name of the shot when you see through a character's eyes

**4.** When the camera is placed on an angle high above the character

**6.** A shot which shows something in lots of detail like an eyeball

**7.** When the camera is placed on an angle low below the character
