# Energy Transfer

## Across

5. The type of radiation with the lowest energy
7. Temperature of air with low pressure
8. The movement of a fluid due to the change in temperature
9. The movement of air in the Earth
10. The movement of water in the Earth

## Down

1. The type of radiation with the highest energy
2. These currents travel on the surface of water
3. These currents travel deep down in the ocean
4. The transfer of energy in the form of heat or electricity
6. Energy from a source that travels through space
