

Name: \_\_\_\_\_

# Introduction to Microbiology

## **Across**

- 5. Propel bacteria
- 6. Manuals used to identify organisms
- 7. Proved Germ theory of disease
- 11. Discovered the first antibiotic
- 13. Toilet bowl scum is an example of a
- 15. Used to transfer DNA between bacteria

- 16. Gram negative
  - 17. Most microbes are \_\_\_\_\_ to humans.
  - 18. Curved or corkscrew bacterial shape
  - 19. Round bacterial shape
  - 20. Scientist who developed Cell Theory
- ## **Down**
- 1. Scientist who came up with Biogenesis
  - 2. Scientific names use this

- 3. Elongated bacterial shape
- 4. Lack a cell wall
- 8. Single-celled or "pre-nucleus"
- 9. Microbes normally present in/on the body
- 10. Unit used to measure most microbes
- 12. Gram positive
- 14. Woese classified organisms into three
