## **Principles of Flight Vocabulary**

## <u>Across</u>

3. \_\_\_\_\_ is the way objects move through the air.

6. The straight line between the foremost and hindmost points of an airfoil viewed from the side is called the

7. A \_\_\_\_\_ is a rapid reduction in lifting force caused by exceeding the critical angle 5. A\_\_\_\_\_ is a structure such as a wing or of attack.

9. Up and down movement of the plane's nose is \_\_\_

10. Controlled space for testing airflow over a wing is a\_\_\_\_\_

## <u>Down</u>

**1.** Theory

2. The angle between the direction of the relative wind and chord line of airfoil is the

4. The motion of air as it relates to the aircraft within it is

propeller blade

**8.** The curve of an airfoil is the
