# Geometry

## Across

2. A polygon with five sides  
 5. A polygon with six sides  
 7. On angle that measures  $180^\circ$   
 8. The unit of measurement for measuring angles  
 11. One side of the endpoint  
 12. A polygon with three sides  
 14. Location in space

15. Lines that have no points in common

17. Lines that intersect to form right angles

19. Two end point s

20. Has four right angles it all sides are equal

## Down

1. On angle that measures less than  $90^\circ$

3. Has one right angle

4. A polygon with eight sides

6. A tool used to measure angles

9. Used to make up polygons

10. A closed plane figure made up of line segments

13. Two opposite directions

16. The point of intersection of two sides of an angle

18. A flat surface
