ions and covalent compounds

Across
6. When atoms share two electrons
10. They are __ the highest energy level
11. When an atom or group of atoms have become electrically charged
12. A three dimensional pattern of ions or atoms
13. When to atoms share electrons

Down
1. Lacks most properties of a metal
2. What show the valence electrons
3. Composed of molecules
4. When the Electrons are shared equally
5. Made of more than one atom
7. Attraction between oppositely charged ions
8. Made of two or more atoms
9. Characterized by its physical properties
