

# Ionic and Covalent

## Across

**2.** electrons in the highest energy level

**4.** oppositely charged attracted ions

**11.** composed of molecules

**13.** atom shares 2 or more electrons

**14.** shared equally

**15.** shared unequally

## Down

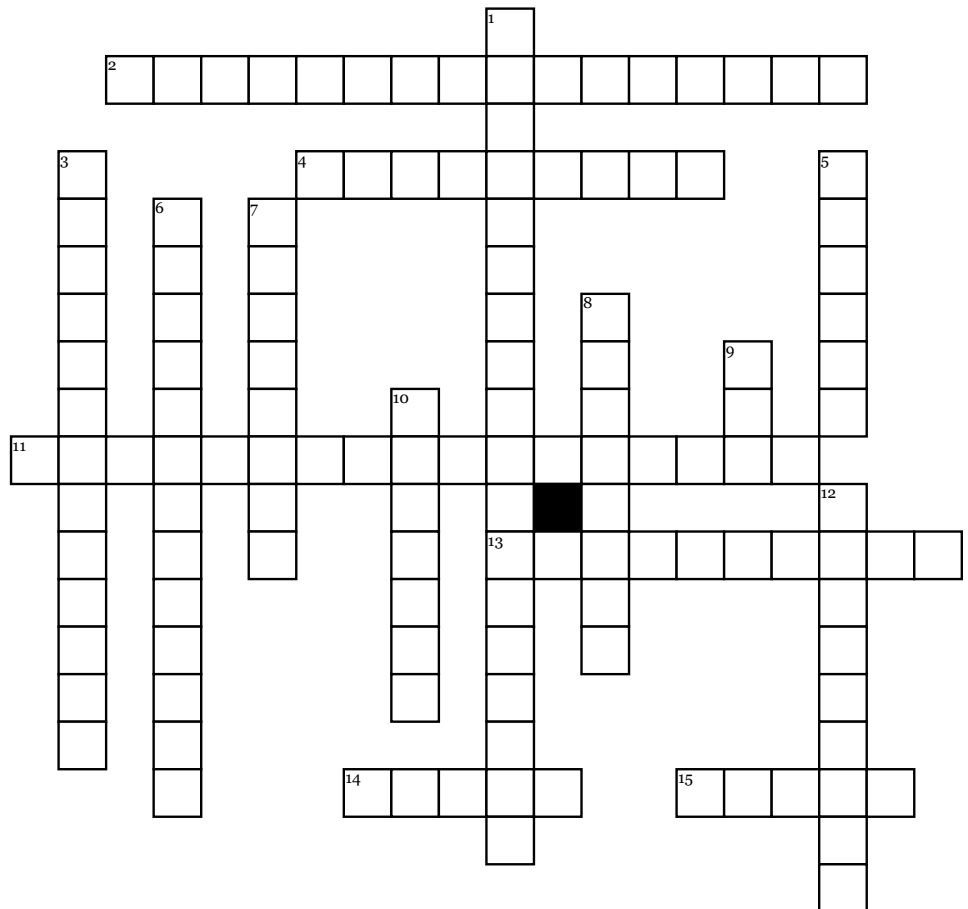

**1.** dots around and element

**3.** made of more than one atom

**5.** shininess, malleability, ductility

**6.** formed when 2 atoms share electrons

**7.** two or more atoms

**8.** 2 or more elements chemically combined

**9.** atom(s) that has become electrically charged

**10.** three dimensional pattern

**12.** lacks properties of metals
