

# ionic and covalent

## Across

- 2. electrons in the highest energy level
- 4. oppositely charged attracted ions
- 11. composed of molecules
- 13. atom shares 2 or more electrons
- 14. shared equally
- 15. shared unequally

## Down

- 1. dots around an element
- 3. made of more than one atom
- 5. shininess, malleability, ductility
- 6. formed when 2 atoms share electrons
- 7. two or more atoms
- 8. 2 or more elements chemically combined
- 9. atom(s) that has become electrically charged
- 10. three dimensional pattern
- 12. lacks properties of metals
