## Across

- 1. The flow of water from the surface into the ground
- 7. The type of pollution that you do not know exactly where it is coming from 2. Material that does not let water
- 8. Material that lets water flow through it
- 9. The land that drains into a particular body of water
- 10. A layer of permeable rock that allows water to flow through it; people drill wells to it to get fresh water

11. Water that runs off the surface of a watershed and collects in lakes, rivers and ponds

## Down

- flow through it
- 3. The type of pollutiont that you know exactly where it is coming from
- 4. pieces that bbreak off of rock
- **5.** Rain, sleet, hail or snow
- **6.** Water that collects in the cracks and pores underground
