Across

- **3.** The link between the organisms, in which animal eats and gets eaten by another organism
- **6.** Part of plant where photosynthesis generally occur
- **7.** the product of photosynthesis
- **10.** A compound needed for photosynthesis which is present in air

<u>Down</u>

- **1.** A plant pigment that absorbs sunlight
- **2.** the process by which plant use energy from the sun to produce sugar
- **4.** A compound needed for photosynthesis
- 5. An animal that eats plant
- 8. A by product of photosynthesis
- **9.** Chlorophyll absorbs every color of sunlight except this
