

Name: _____

Date: _____

Classification

Across

4. The kingdom of Classification in which members often have traits of both plants and animals.

5. a large group specifically having simple cells with rigid walls and very often a flagella for movement

7. The name of the kingdom that is made up of animals

8. The name of the kingdom of plant-like organisms that do not make their own food but take the nutrients that they need from the environment.

10. The kingdom that includes bacteria.

11. The second part of an organisms scientific name that identifies one specific organism in the genus

13. A classification system useful for storing and finding information about living things

14. A structure or feature of an organism that helps it meet a particular need in its natural habitat

15. a microscopic single-celled organism that does not have a distinct nucleus with a membrane or specialized organelles. This group consists of all bacteria.

Down

1. The arrangement of things in groups of similar items

2. A guide used to identify an organism based on its characteristics

3. microorganisms that are similar to bacteria in size and simple structure but different in molecular organization.

6. cells that contain membrane bound organelle and have chromosomes in DNA inside the nucleus. This group includes all living organisms(animals, plants, fungi, and protists) other than all types of bacteria.

9. The first part of an organisms scientific name; a group of organisms that share major characteristics and are therefore closely related.

12. The name of the kingdom that is made up of plants
