

# Microbiology Revision

## Across

5. An infection that has spread throughout the body

9. Unicellular eukaryotic microorganisms that usually lack cell walls

11. Malaria is caused by this parasite.

12. Structures that allow for movement in bacteria

13. Hepatitis is a virus which mainly which organ in the body?

15. Feeding on dead organic matter

16. Micro-organisms that contain chitin cell walls

17. An organism which lives in or on another organism and causes harm.

## Down

1. Influenza is classified as this

2. Parasitic worms

3. Bacterial Shape

4. Study of microscopic organisms

6. Viruses are composed of a protein coat and a \_\_\_\_\_

7. First antibiotic

8. Micro-organisms that are capable of causing disease

10. Many micro-organisms have the ability to develop into these in order to survive

14. Bacteria require time, warmth, oxygen, food and \_\_\_\_\_ for growth
