Microbiology Revision

Across

- **5.** An infection that has spread throughout the body
- **9.** Unicellular eukaryotic microorganisms that usually lack cell walls
- **11.** Malaria is caused by this parasite.
- **12.** Structures that allow for movement in bacteria
- **13.** Hepatitis is a virus which mainly which organ in the body?

- **15.** Feeding on dead organic matter
- **16.** Micro-organisms that contain chitin cell walls
- **17.** An organism which lives in or on another organism and causes harm.

Down

- **1.** Influenza is classified as this
- 2. Parasitic worms
- 3. Bacterial Shape

- **4.** Study of microscopic organisms
- **6.** Viruses are composed of a protein coat and a ____
- **7.** First antibiotic
- **8.** Micro-organisms that are capable of causing disease
- **10.** Many micro-organisms have the ability to develop into these in order to survive
- **14.** Bacteria require time, warmth, oxygen, food and _____ for growth
