

Plant Cells

Across

- 4. type of plant cell used for support and wind resistance
- 7. Rigid layer that surrounds the cell membrane of plant cells
- 8. the green pigment in a chloroplast
- 10. group of membrane bound organelles that include chloroplasts, chromoplasts, leucoplasts
- 11. saclike organelle that stores water

Down

- 1. the process where plants make their own food
- 2. Organelle that is the cite of photosynthesis
- 3. plant cell type used in photosynthesis, cell respiration, and storage
- 5. plant cell used for support and strength
- 6. type of carbohydrate found in cell walls of plants
- 9. the hydrobphobic molecule that stiffens and waterproofs vascular tissue
