

Name: _____ Date: _____ Period: _____

Cell Parts

Across

3. Storage organelle

8. Does photosynthesis and creates food/energy for plant cells

9. Lets things go in and out

10. Creates proteins for cell

11. Carries materials throughout the cell

Down

1. Creates energy for the cell

Word Bank

Nucleus

Cell Wall

Golgi Complex

Chloroplast

Cell Membrane

Mitochondria

Endoplasmic Reticulum

Cytoplasm

Vacuole

Lysosome

Ribosome

2. Packages and distributes materials such as proteins

4. Breaks down wastes, cell parts, and foreign intruders by producing enzymes

5. Used in plant cells to give the plant cell structure and support

6. The brain

7. The substance that the cell organelles float in
