# Algebra II crossword

## Across

5. the equation of a line in the form of  $y = mx + b$ , where  $m$  is the slope and  $b$  is the  $y$  intercept  
 7. the shift of a graph of a function horizontally, vertically or both  
 10. a polynomial of three terms  
 13. one of the positive or negative whole numbers or zero  
 15. the numerical factor in a term  
 17. any value of  $x$  for which  $f(x) = 0$   
 19. a set of ordered pairs  
 20.  $(x, y)$   
 22. a statement that two algebraic expressions are related but not equal  
 23. the set of all outputs of a relation (usually  $y$ )  
 24. the set of all inputs in a relation (usually  $x$ )

25. a function of the form  $y = a$  where  $a$  is a real number

## Down

1. an expression consisting of the sum of one or more terms in which each is the product of a constant and a variable raised to an integer power  
 2. a quantity whose value does not change  
 3. the common factor of each term of an expression that has the greatest coefficient  
 4. a point at which a graph of a function crosses the  $y$ -axis  
 6. Rewriting an expression as the product of its factors.  
 8. a point at which a graph of a function crosses the  $x$ -axis

9. ratio of vertical change to horizontal change in a non-vertical line; change in  $y$  over change in  $x$   
 11. The distance of a number from zero on the number line.  
 12. a polynomial of one term  
 14. a polynomial of two terms  
 16. a relation in which each element in the domain corresponds with exactly one element in the range  
 18. symbol, usually a letter, that represents one or more numbers  
 21. a statement that two algebraic expressions are equal
