

Name: _____

Date: _____

Cells Unit Crossword

Across

2. Which cells lack a nucleus and most other organelles?
3. How do skin cells reproduce in your body?
8. How many layers of phospholipids are there in the cell membrane?
10. Who invented cells?
11. What do property describes phospholipid tails avoiding water?
12. What gives plant cells shape?

13. What do you call the passive transport of water across a semi-permeable membrane?

14. This process allows molecules to move from an area of high concentration to an area of low concentration

Down

1. This process moves large molecules across the cell membrane through the use of transport proteins.
4. What regulates movement in the cell?

5. The phospholipid heads of the cell membrane are attracted to water, what do we call this property?

6. These molecules can easily travel through the cell membrane

7. Which cells have a nucleus and other membrane bound organelles?

9. Which molecules have a tough time getting through the cell membrane?
